

Where is Pitcairn Island?

Pitcairn Island is in the Pacific Ocean, roughly 2170 km south-east of Tahiti. It is formed from the crater of a volcano, and has a tropical climate with very fertile land! So far, this island sounds like all of the other islands I've talked about so far - small, far away, difficult to reach, and with a small population.

What is Pitcairn known for?

The island's honey is renowned for its purity and unique flavor, derived from local flora. Pitcairn also exports jewelry, carvings, coffee, and traditional Polynesian goods like Tapa cloth. These products are sold internationally and provide additional income streams for the island's residents.

What makes Pitcairn unique?

Settling into local life is inevitable when 'marooned' on the UK's furthest-flung island among the descendants of the Bounty mutineers - but it's also what makes Pitcairn unique... [Link copied!](#) At Matavai Bay the incoming waves hurried through a gap in the reef before breaking on the chocolate-coloured sand.

How to get to Pitcairn Islands?

Totegegie Airport in Mangareva can be reached by air from the French Polynesian capital Papeete. There is one 6.4-kilometre (4 mi) paved road leading up from Bounty Bay through Adamstown. The main modes of transport on Pitcairn Islands are by four-wheel drive quad bikes and on foot.

Are there Adventist churches in Pitcairn?

Archived from the original on 19 October 2015. Although the Adventist Church has always maintained a resident minister and nurse on Pitcairn, there have been fewer adherents and some church members have moved away from the island. By the end of 2000, regular church attendees among the island population of 40 numbered only eight.

What happened to Pitcairn?

Many of the new visitors were liners carrying hundreds of passengers anxious to have mementos of the island, halfway rock on the longest regular service in the world. A ship a week, and Pitcairn's isolation was over! The pattern of life changed, inevitably.

Various forms of evidence show the earliest settlers of the Pitcairn Islands were Polynesians who occupied Pitcairn and Henderson for several centuries until the islands were abandoned: Henderson most likely before the 16th century and Pitcairn in the 17th or early 18th century. The islands were uninhabited when they were discovered by Europeans.

Discover the Pitcairn Islands, a remote British Overseas Territory with no airport, only 50 residents, and the world's smallest capital city!

Pitcairn Islands sterlingwilson

As you sail towards Pitcairn, you approach one of the remotest of the world's inhabited islands, lying halfway between New Zealand and the Americas. Four thousand eight hundred kilometres of open ocean separate you from them; a few archipelagos lie to the north; and the southern seas are empty to the ice caps of Antarctica.
