

Power back up for house Mexico

Do you need an emergency backup power system in Mexico?

Power outages are a common occurrence throughout every region of Mexico, but an emergency backup power system with an AIMS Power inverter, as the backbone will keep your electricity running regardless of the circumstances. Achieving off-grid, mobile and/or emergency backup power in Mexico is an extremely valuable resource.

Do power inverters work in Mexico?

Power inverters are a priceless resource in Mexico, and since the country uses the same electrical system as the United States - 120 Vac 60 Hz - that means we have a large selection of products that will work properly within those parameters.

Do power outages happen in Mexico?

The short of it is that power outages do happen in Mexico. Trust me, the good far outweighs the bad--especially if you're prepared for the worst case scenario. Buying a voltage regulator with a built-in UPS is probably the best thing you can do to protect your electronic devices and continue working during an emergency.

How much does a power regulator cost in Mexico?

They're rather expensive--about \$300 USD--but if you can afford it, you can be sure that you won't lose your data in your computer if the electricity suddenly cuts out in Mexico. Instead, the voltage regulator will power your device long enough for you to safely shut down without losing your data. Power outages are a common problem in Mexico.

Equipping your home with permanent backup power requires a solution as unique as your home and the way you live in it. Work with a local Authorized Generac Dealer to get a detailed estimate for a solution that's configured specifically for you.
