

How has solar energy index changed over the past month?

Over the past month, Solar Energy Index's price has risen 4.51%, and is up 6.90% compared to the same time last year, according to trading on a contract for difference (CFD) that tracks the benchmark market for this commodity. Historically, Solar Energy Index reached an all time high of 307.90 in May of 2008.

How does pvxchange differentiate between the main technologies available on the market?

In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable industry tool. Today, it is hard to imagine the industry without our price index, trend data, and in-depth analysis and commentary.

How is solar price measured?

The solar price for utility-scale projects is measured using LCOE, which typically has the lowest LCOE among all solar PV sectors. As solar prices continue to decline, utility solar PV plays a key role in the global energy transition, supporting large-scale renewable energy adoption.

Does pvxchange offer a price index?

Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable industry tool. Today, it is hard to imagine the industry without our price index, trend data, and in-depth analysis and commentary. Please find here a collection of all available market comments: [Market Analysis](#)

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.

How much will the US solar industry contract in 2025?

The US solar industry is projected to contract by 2% annually between 2025 and 2030 in our Base case but still add nearly 43 GWdc on average each year. In the near term, solar installations will decline at an average rate of 7% from 2025 to 2027.
