

Rural sun power Sudan

Can solar power irrigation pumps in Sudan?

Solar panels power irrigation pumps on a farm in Northern State (UNDP Sudan/Muhanad Sameer) KHARTOUM (Sudan) - Sudan was one of the first nations to understand the importance of renewable energy. In this bid, the country took good steps in early 1980s for the development of rural areas via the technologies of solar and wind energies.

Is solar energy making a comeback in Sudan?

Fortunately, the country is now witnessing a comeback to solar energy as it is an effective tool to drive development, employment, and stability - particularly in rural and agriculture-focused communities. In Sudan, access to energy is a critical tool, and solar is an effective way to achieve this.

How can solar power help refugees in Sudan?

In Eastern Sudan's refugee camps and surrounding local communities, solar cookers are being provided by the agency to reduce cutting of local forests for firewood, solar streetlights installed to improve security, and small panels distributed to allow cellphone charging. These are all practical solutions that can be deployed in most areas in Sudan.

What should Sudan's government do about solar energy?

Mr. Afanasiev advised the Sudan's government to continue its current direction of expansion of renewable energy solutions and continue efforts to make solar technology as accessible as possible. The cost should be reduced by tax and duty exemptions.

Why is energy development important in Sudan?

Sudan faces many energy development challenges brought about by high electricity subsidy levels and climate-induced impacts on hydroelectric generation which has been decreasing at a rate of about 4% per year. Improving access to modern and affordable energy is a development priority for Sudan.

Will Sudan produce 500 megawatts of solar power?

Also, in November 2020 Sudan and the United Arab Emirates signed a memo of understanding for the production of 500 megawatt of solar electric power. The Gulf state, represented in one of its specialized companies, would import, build, install and operate the stations for twenty years and train the local workers.
