Who is RWE renewables Korea LLC?

RWE Renewables Korea LLC was newly established to explore and expand renewables energy business in Korea. Since Korea is a peninsula with sea on three sides, we believe that it has a great advantage in the possibility of generating offshore wind energy which is a future energy source.

Who is RWE battery storage?

As a battery storage pioneer, RWE develops, builds and operates innovative and competitive large battery storage systems as well as onshore and solar-hybrid projects in Europe, Australia and the US.

Where is RWE based?

RWE's local team in Korea is backed by the expertise of its nearly 2,000 people strong global offshore wind expert team. RWE has currently two offshore wind farms, Thor (1.1 GW) in Denmark and Sofia (1.4 GW) in the UK, under construction, and further projects in development worldwide.

How can RWE connect battery storage technology with green electricity production?

When it comes to linking battery storage technology with green electricity production, RWE can draw on many years of experience in the energy storage and renewables sector. The company provides project planning, modelling, system integration, and commissioning of the projects in house and under one roof. Beginning of dialog window.

Will RWE and Hyundai Engineering & Construction cooperate in offshore wind & green hydrogen?

RWE, one of the world's leading companies in offshore wind, and Hyundai Engineering & Construction, a subsidiary of Korea's prestigious Hyundai Motor Group, have signed a Memorandum of Understanding (MoU) to cooperate in the field of offshore wind and green hydrogen.

Who is RWE offshore wind?

Sven Utermöhlen, CEO RWE Offshore Wind: "As RWE we are honoured to partner with Hyundai E&C, one of the most prominent and respected companies in Korea and beyond. Korea is one of the most attractive markets for the development of offshore wind and green hydrogen.
