Are lithium-ion batteries safe to store?

Lithium-ion battery fires can even reignite after being contained. In this post, we'll talk through the safe storage requirements for lithium-ion batteries that manage the risks to keep people and facilities safe. The UK doesn't have specific regulations or legislation for the general storage of lithium-ion batteries.

How to store a lithium battery?

Follow these steps to ensure their safety and optimal performance: Lithium batteries should not be stored at full charge or completely discharged. For long-term storage, it is recommended to store them at a charge level between 40% and 60%. This level helps minimize self-discharge without putting excessive strain on the battery.

Can you store lithium ion batteries in the UK?

The UK doesn't have specific regulations or legislation for the general storage of lithium-ion batteries. The Health and Safety Executive has, however, published guidance on good practices for handling and storing batteries, even though it is not compulsory. Regulations are not prescriptive but instead follow the typical routes:

Can lithium batteries be stored at full charge?

Lithium batteries should not be stored at full charge or completely discharged. For long-term storage, it is recommended to store them at a charge level between 40% and 60%. This level helps minimize self-discharge without putting excessive strain on the battery. It is crucial to check the voltage of lithium batteries before storage.

Can lithium-ion batteries be stored in a garage or basement?

While it is generally safe to store lithium-ion batteries in a garage or basement, it is important to ensure that these areas meet the recommended storage conditions. Make sure the storage space is cool, dry, well-ventilated, and away from any flammable materials.

Can lithium ion batteries be stored in metal containers?

Metal containers can potentially cause a short circuit and increase the risk of fire or explosion. It is best to store lithium-ion batteries in their original packaging or in non-conductive containers specifically designed for battery storage. Is it safe to store lithium-ion batteries in a garage or basement?
