

# Safety briefing content storage

What makes a good safety briefing?

To be effective, safety briefings need more than good information--they need the right content delivered in the right way. Let's break it down. 1. Start With Today's Hazards Be specific and site-relevant. Identify real, present risks--don't just list generic ones. "Today we're pouring concrete in 30°C heat."

What are content safety containers?

With content safety containers, you can build a content safety application architecture optimized for both robust cloud capabilities and edge locality. Containers help you meet specific security and data governance requirements. The following table lists the content safety containers available in the Microsoft Container Registry (MCR).

Is the content safety container available in public preview?

The content safety container is available in public preview. Containers in preview are still under development and don't meet Microsoft's stability and support requirements. To use the content safety containers in environments that are disconnected from the internet, you must submit a request form and wait for approval.

What are azure content safety containers?

Containers let you use a subset of the Azure AI Content Safety features in your own environment. With content safety containers, you can build a content safety application architecture optimized for both robust cloud capabilities and edge locality. Containers help you meet specific security and data governance requirements.

How do content safety containers communicate billing information to Azure?

The content safety containers send billing information to Azure through the content safety resource in your Azure account. Content safety containers aren't licensed to run without being connected to Azure for metering. You must configure your container to always communicate billing information with the metering service.

How do you write a safety briefing?

Using fear-based language("You'll get written up if...") Remember: A safety briefing should feel relevant, respectful, and routine --never robotic. Pair your briefings with posters, infographics, or a quick hands-on demo. Follow up during the shift with short reminders or praise when safe practices are observed.
