

Saint Pierre and Miquelon tesla backup battery

Why are Tesla batteries recalled?

According to the recall notice, cells inside the battery units are at risk of overheating and starting fires. This recall comes on the heels of several fires involving Tesla solar products. More and more homeowners are requesting battery backup solutions as part of their solar power installations.

Could Nio leave Tesla's Model S saloon?

The ET7 is considered a direct rival to Tesla's Model S saloon. Yet, if range claims are officially acknowledged by the WTLP, Nio could leave the US EV maker, Polestar and Merc - where the 2 and EQS boast over 400 miles - behind at the charging hub.

How much does a Tesla battery weigh?

To give that some context, Tesla's 4680-cell battery - considered the best on the market for a long time - has 272-296Wh/kg. The more remarkable feature is that vehicles fitted with the new pack, according to China News EV Post, weigh 'only 20 kilos more than before'.
