share (%) 18 19 Growth in TES 2016-21 2020-21 Non-renewable (%) -1.2 -3.0 Renewable (%) +11.1 -0.5
Total (%) +1.0 -2.5 Primary energy trade 2016 2021

Is biomass a source of electricity in Macedonia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. North Macedonia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Is North Macedonia a state-owned power company?

North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s. Austrian utility company EVN has been responsible for electricity distribution in North Macedonia since entering the market in 2006.

How many power plants are there in North Macedonia in 2022?

The electric power generation capacity in North Macedonia in 2022 mainly consisted of two coal thermal power plants with a total of 824 MW installed capacity, nine large hydropower plants with 571 MW installed capacity, 123 small hydropower plants with 148 MW installed capacity and three gas CHP plants with 287 MW installed capacity.

Does Macedonia have a wind farm?

North Macedonia has a 36.8 MW wind farm at Bogdanci and has received EU and KfW financing to expand it. It was the first country in the Western Balkan region to put into operation a sizeable wind facility. Its second wind farm, the 36-MW Bogoslovec, only started operating in mid-2023.

Will a new Zivojno mine prevent North Macedonia from achieving a timely coal phase-out?

However, reality is not following the NECP. According to the state-owned electricity company ESM's 5-year investment plan 2018-2022, the commissioning of a new Zivojno mine could extend the coal supply to TPP Bitola for another ~10.6 years. This would obviously prevent North Macedonia from achieving a timely coal phase-out.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

North Macedonia welcomes investments in the energy sector. The government invites companies to design,

build, and operate new large and small hydro power plants, wind, solar, and biogas farms. Companies can also apply for tenders to construct sections of the national gas distribution network.
