How a Pacific Island Changed From Diesel to 100% Solar Power. The island of Ta'u in American Samoa now boasts a solar microgrid from Tesla's SolarCity.

4 · The Virgin Islands Consortium was founded in 2014 by Ernice Gilbert and covers U.S. Virgin Islands and Caribbean news, politics, opinion, business, entertainment, culture and much more.

Tesla has announced their solar panels are nearly entirely powering the island of Ta'u in American Samoa. The island used to depend entirely on imported diesel fuel for its electricity, but a new initiative has seen the islanders build a 1.4-megawatt microgrid that absorbs and stores solar power for all their energy needs.

After Hurricane Maria in 2017, where the island's power grid was fully restored after eleven months, non-profits are installing solar PV on community centers to ensure quick electricity supply in the case of a blackout.

Together, Tesla and SolarCity installed a solar power array and battery storage-enabled microgrid on Ta'u to demonstrate that potential by supplying nearly 100 percent of the island's power...

2 · Atlantica Sustainable Infrastructure has acquired a development platform in the US, comprising approximately 1.1GW of solar and wind projects under development in the Midcontinent Independent System Operator (MISO) and Southwest Power Pool regions. The acquisition enhances Atlantica's presence in the US renewables sector.

Microgrids powered by solar panels and supported by batteries are spurring hopes of a silver lining for Puerto Rico and other Caribbean islands. But cost, time pressures and resilience may keep ...

The United States Minor Outlying Islands consist of 11, mostly uninhabited islands in the Pacific (8 islands) and the Caribbean (3 islands) that are considered insular areas of the United States. In other words, they are territories of the United States where the residents do not pay federal taxes and are not represented in the United States ...

Recently, Tau Island made headlines with the inauguration of a groundbreaking solar microgrid from Tesla's SolarCity -- a project that has propelled the island towards 100% solar power. Let's explore the story of Tau Island's green revolution and the significant impact it has had on its community and environment.
