

Smart energy Timor-Leste

Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the population but the country has yet to achieve energy security.¹ Consumer costs, even with government subsidy, remain high and outages are common. In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

4 ¶ The project specifically aims to switch Timor-Leste, Papua New Guinea, Samoa, and Vanuatu to renewable energy and reduce dependence on fossil fuel. Completed in Timor-Leste in December 2024, the installation of solar and solar lights in villages without running water or access to electricity has been funded by the Japanese government and seen 1,000 solar kits ...

Energy-efficient solar systems in the UN Compound in Timor-Leste are helping cut down costs of nearly US\$ 542,490 and save 1765 tons of CO₂ over the last six years. The switch to clean energy, a critical part of UN reforms ongoing in the country, is the largest renewable energy initiative undertaken in Timor-Leste, paving the way for other ...

The UN in Timor-Leste, under the leadership of the Resident Coordinator, has now started lighting the way with its solar-powered grid which has begun to give maximum dividends.

For Timor-Leste, as a new country, developing a renewable energy sector is essential to enhance and improve its economy. In addition, renewable energy development is critical in supporting...

In Southeast Asia, Electricidade de Timor-Leste has secured funding from the Asian Development Bank (ADB) to modernise its grid network with smart meters and smart grid technologies. The utility will use a \$35 million loan from the ADB to ensure its grid network is resilient enough to power consumers in 12 municipalities.

Timor-Leste's National Strategic Development Plan 2011-2030 targets that everyone in Timor-Leste will have access to reliable electricity 24 hours a day by 2030. To achieve this target, rural electrification is a priority in Timor-Leste which will also contribute to urban and rural job growth and development.

Timor-Leste invests on Renewable Energies One of the big objectives of the IV Constitutional Government is to finish with the external dependency of energy supply through the national development of alternative and renewable energies source.

With the new UN reforms, the United Nations in Timor-Leste, under the leadership of the Resident Coordinator (RCO) has now started lighting the way with its solar-powered grid which has begun to give maximum dividends.
