

Solar container car test drive

What is the world's first off-road solar car?

TU/e student team Solar Team Eindhoven has reached the end point of their 1,000-kilometer test drive, from northern Morocco to the Sahara, with the world's first off-road solar car Stella Terra. In Morocco, the solar car traveled through dry riverbeds, forest area, along steep mountain trails and through the loose desert sand.

How far can a solar car go off-road?

Off-road, the range averages about 550 kilometers, depending on the surface. Images by Solar Team Eindhoven | photos by Bart van Overbeeke and Rien Boonstoppel Solar Team Eindhoven first introduced Stella Terra in March 2023 as a concept vehicle, and then in September 2023 as a real-life model, calling it the world's first off-road solar car.

Can a solar-powered car travel through desert sand?

In a recent 1,000-kilometer test drive, the team succeeded in driving their solar-powered car from Northern Morocco to the Sahara, traveling through dry riverbeds, forest areas, along steep mountain trails, and through the loose desert sand.

Can solar power a car?

While solar panels alone don't fully power the vehicle, they significantly improve overall efficiency and sustainability -- especially for local or daily commutes. The solar energy captured can be used to: This makes Zem ideal for urban travel or emission-free campus shuttles. The students didn't stop at clean power and air purification.

Can a solar-powered electric car make the air cleaner?

Meet Zem-- a solar-powered electric car built by students that doesn't just run clean, it makes the air cleaner. Designed by Eindhoven University of Technology, this futuristic car captures CO₂ while driving and is made from recycled materials using 3D printing. It's a bold leap toward truly sustainable, climate-positive transportation.

Is Stella Terra a solar car?

This solar car, which is road legal, has a top speed of 145 kilometers per hour, weighs only 1200 kilograms, and has a range of 630 kilometers on a sunny day. Stella Terra is equipped with ProteanDrive in-wheel motors, which offer many advantages to a solar-powered vehicle.
