

Solar container factory inspection report

What is a factory inspection?

For many years, and thanks to its ISO 17025 accredited laboratory experience, ELIOSYS has carried out factory inspections for its customers to determine whether the materials used are compliant and whether best manufacturing practice is applied on production sites worldwide. The result of a factory inspection is documented in a technical report.

What happens after a factory inspection?

The result of a factory inspection is documented in a technical report. This report will include many points and will end with an assessment including preventive, corrective or improvement actions.

What is included in a factory inspection report?

This report will include many points and will end with an assessment including preventive, corrective or improvement actions. If the report does not include comments affecting the quality of the modules produced, a factory inspection attestation and/or a local European production statement of conformity will be prepared and sent.

Does container manufacturing take a lot of space?

Container manufacturing can take (a lot of) space. If your project requires a 40ft container, your container manufacturing will probably take place outdoors. During that step, several points need to be looked at: o Manufacturing environment: no clean room required here, but is there any risk of electrocution following a heavy rain?

What is the validity of a factory inspection attestation?

CONTROL OF THE QUALITY MANAGEMENT SYSTEM. The validity of a factory inspection attestation is 1 year. This guarantee is associated with our ELIOCERT attestation of conformity (IEC 61215 and IEC 61730) to ensure control continuity of a PV product.

When should a battery energy storage system be inspected?

Sinovoltaics advice: we suggest having the logistics company come inspect your Battery Energy Storage System at the end of manufacturing, in order for them to get accustomed to the BESS design and anticipate potential roadblocks that could delay the shipping procedure of the Energy Storage System.

With our software, thermal, electrical, and capacity disbalance is detected and corrected during your Factory Acceptance Testing (FAT) test. During the factory ...
