

# Solar energy investment companies Slovakia

The Slovakia solar energy market exhibits regional variations in terms of solar energy potential, market maturity, and regulatory frameworks. Different regions within Slovakia may have varying solar irradiation levels and resource availability, impacting the ...

In April 2022, investment from the private sector in installations of solar power plants presented an increase in the use of renewable energy sources in Slovakia. Small and Medium-size companies and energy-intensive factories have been investing heavily in solar park development in the southern Slovak city of Sturovo.

ContourGlobal owns ground-mounted PV solar energy plants at 32 sites in Slovakia with a gross capacity of 35 MW, each of which is operational and connected to the Slovakian national energy grid. The Slovakian Solar Plants, commenced operations between 2010 and 2011.

The current Slovakia's NECP projects a solar PV target of 1,200 MW cumulatively installed in 2030. While the NECP does not specify the character of these capacities, it is to be assumed that both ground-mounted and rooftop PV will play a role in harvesting Slovakia's solar potential.

The renewable energy sector, particularly solar power, is experiencing a remarkable upswing due to high energy prices and a strategic move away from dependency on Russian gas. This trend is prominently led by private companies, including small to mid-size businesses and larger ventures like the solar park near Sturovo.
