

Are solar panels a viable alternative energy source in Syria?

As an option that seemed to be one of the best alternative energy sources in Syria, reinforced by the absence of fuel, the spread of solar panels began in most regions, respectively, years ago, amid "government" support and adoption of this trend.

Does Syria have solar energy?

Northeastern Syria, which is mostly under the control of the Autonomous Administration, is witnessing the spread of solar energy systems, like most Syrian regions, but they seem to be limited in the homes and facilities of families living in a good economic situation, according to what Enab Baladi monitored.

How much does a solar panel cost in Syria?

The price of a panel capable of charging a small battery and lighting a room is about 80,000 Syrian pounds, regardless of its quality, while the monthly salary of her husband, who is an employee in an agricultural establishment affiliated with the Syrian regime, is about 110,000 Syrian pounds.

Is Syria a good country for solar energy?

Regarding wind energy, which is the second source of energy, Syria is not considered one of the countries that have a sufficient amount of wind throughout the year to produce electricity, and therefore the solar energy situation is regarded as the best in it.

Are solar panels a better option than losing electricity in Syria?

According to an opinion poll conducted by Enab Baladi, a number of Syrians residing in various governorates considered that alternative energy through solar panels is a better option than losing electricity despite its high costs and regardless of the controlling parties.

How to install solar energy in Damascus?

Nidal Hafez, Director of Services Departments in Damascus Governorate, said that a citizen who wants to install solar energy must submit a request to the governorate to organize its installation on the roofs of buildings of common ownership, and the Services Directorate determines the area in which he/she can install.

Committed to transforming the electricity landscape and increasing the adoption of renewable energy in Syria, the government is aiming to have 10% of electricity generated from solar power by 2030. The Syrian Ministry of Electricity is currently managing the construction of a 100kW solar power plant in the town of Sargaya, which is scheduled to ...

The Syrian Investment Agency has issued an investment license for a solar panel manufacturing project in Adra Industrial City, with a production capacity of 150,000 ...

Solar invest group Syria

Locals value the solar panels in Syria despite a high initial investment cost. In interviews with The New York Times, many locals described the panels as "god-sent." After the initial investment, solar panels are a virtually cost-free source of electricity. Thousands of locals now use solar panels to power their lights and electronics.

The Syrian Investment Agency granted an investment license for a photovoltaic solar plant project with a capacity of 10 megawatts annually in the industrial city of Adra, in Damascus Countryside. In a statement to SANA, Director of the Syrian Investment Agency, Madian Diab, stated that the estimated cost of the project amounts to 49 billion ...
