

Solar panel energy production Portugal

How much solar energy does Portugal produce?

In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September 2024, celebrating a record year for solar energy production. According to REN (Rede de Energia Nacional), the country generated more than 3.99 TWh of solar energy in just the first nine months, exceeding last year's total of 3.6 TWh.

What is the largest solar power plant in Portugal?

On 9 October 2021, the largest solar power plant in Portugal was inaugurated in Alcoutim. With an installed capacity of 219 MW, the power plant has 661,500 solar panels and can power the needs of 200,000 homes. It occupies an area of 320 hectares and will prevent the emission of 326,000 tons of carbon dioxide every year.

How much solar power does Portugal have in 2020?

At the end of 2020, solar power installed capacity totalled 1.03 GW and represented 3.6% of total power generation in 2020. Portugal has set a goal of between 8.1 GW and 9.9 GW in installed capacity by 2030. The Serpa solar power plant is an 11 megawatt plant covered 150 acres (0.61 km²) and employs 52,000 PV panels.

Do you need a subscription to use solar power in Portugal?

A paid subscription is required for full access. In 2023, power generation from solar photovoltaics (PV) in Portugal was the highest throughout the summer months, peaking at 665 gigawatt-hours in July. During winter, the country's solar PV power generation dropped, recording the record low of that year in December, at only 268 gigawatt-hours.

Why is Portugal a good country for solar energy?

Because Portugal is one of the countries in Europe with the greatest availability of solar radiation. Our country has 2,500 to 3,200 hours of sunshine per year, an average of 4 to 6 hours in winter and 10 to 12 hours in summer. In other words, Portugal has this clean, abundant and free energy as a source for producing electricity.

Are there solar farms in Portugal?

As it stands, there are a number of large and medium-scale solar "farms" in operation globally. Portugal has a particularly ambitious plan to overhaul its energy production, and is already home to a number of exciting projects to support this.

While Portugal's revised National Energy and Climate Plan (NECP) and Long-Term Strategy for Carbon Neutrality (LTS) have raised targets for decentralised solar photovoltaic (PV) capacity, they remain below the country's solar potential.

In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September 2024,

Solar panel energy production Portugal

celebrating a record year for solar energy production. According to REN (Rede de Energia Nacional), the country generated more than 3.99 TWh of solar energy in just the first nine months, exceeding last year's total of 3.6 TWh.

In 2023, power generation from solar photovoltaics (PV) in Portugal was the highest throughout the summer months, peaking at 665 gigawatt-hours in July. [Skip to main content Statista Logo](#)

The average monthly income for workers in the solar industry in Portugal varies based on their roles and experience. Solar engineer: The average salary in Portugal is \$43,552 USD yearly or an equivalent rate of \$20 USD hourly. An entry level solar engineer with 1-3 years of experience earns an average annual salary of \$30,889 USD, while a senior level solar engineer with more ...

Renewable energy production supplied 53% of the country's electricity consumption in July, with solar production reaching 15% of monthly consumption for the...

Portugal has a particularly ambitious plane to overhaul its energy production, and is already home to a number of exciting projects to support this. Between 2021 and 2030, the country plans to increase the energy it draws from Renewable Energy Sources (RES) to from 30.6% to 47% - with a goal of increasing the electricity produced this way to ...

Solar photovoltaic electricity production in Portugal 2012-2023 Annual volume of electricity produced from solar photovoltaic in Portugal from 2012 to 2023 (in gigawatt hours)

Portugal has a particularly ambitious plane to overhaul its energy production, and is already home to a number of exciting projects to support this. Between 2021 and 2030, the country plans to increase the ...

On 9 October 2021, the largest solar power plant in Portugal was inaugurated in Alcoutim. With an installed capacity of 219 MW, the power plant has 661,500 solar panels and can power the needs of 200,000 homes.

In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September 2024, celebrating a record year for solar energy production. According to REN (Rede de Energia Nacional), the country ...

The solar energy produced up to 5 September equalled the total energy produced throughout 2023. In the first nine months of 2024, 3.99 TWh were generated, surpassing the 3.6 TWh produced between 1 January and 31 December 2023, making 2024 a record year for solar production in Portugal as early as September.

Portugal should reach the 2030 target already in 2025 regarding energy production via renewable sources such as solar energy. According to Adene (Agency for Energy), the forecast is to reach 80% of energy produced from ...
