

Solar panels best South Georgia and South Sandwich Islands

Where should solar panels be installed in Georgia?

Georgia (and the rest of the United States) is in the Northern Hemisphere, so solar panels perform best on south-facing roofs. The worst place to install would be on north-facing roofs, especially if those roofs have a high pitch.

Are solar panels a good investment in Georgia?

The main drawback is the high upfront cost of purchasing and installing the equipment. On the bright side, once that's paid for, solar panels can significantly reduce or even eliminate your electricity bills. For many Georgians, the long-term savings outweigh the upfront costs over time.

What is Alternative Energy Southeast, Inc.?

Alternative Energy Southeast, Inc. is a one-stop shop for your solar panel installation and energy storage needs. From consultation to installation and follow-up, we design, install, and ensure your satisfaction with your solar solution.

Why are solar panels popular in Georgia?

Solar panels have become increasingly popular in Georgia due to their multiple benefits for both residential homes and commercial businesses. In recent years, solar energy installation has risen steadily in response to reducing dependence on natural gas and electricity with solar panels as an alternative energy source.

How much does a solar system cost in Georgia?

In Georgia, a typical residential solar system costs \$9,555 to \$27,300, depending on the size of your system and what financial incentives you qualify for. On average, it takes solar panels approximately 10 years to pay for themselves in Georgia. Over 25 years, Georgia homeowners with solar panels avoid \$57,429 in total utility costs on average.

How do I choose a solar company in Georgia?

Solar companies that are licensed, insured and hold certifications take their business seriously. Look for companies that have NABCEP Certified professionals or certified electricians on staff and are properly insured, so their workers, and you, are protected. In Georgia, a solar installer must be associated with a licensed electrical contractor.

The island of South Georgia is unusual among oceanic islands for having pre-Cretaceous sedimentary rocks underlying much of the island and a significant portion of felsic igneous rocks. Two-thirds of the island consists of intensely folded flysch, capped with Aptian age fossils, tuff and greywacke in the Cumberland Bay Series.
