

Solar power irrigation project Cayman Islands

What is the first commercial solar project in the Cayman Islands?

The 5MW Solar Farm is the first commercial solar project in the Cayman Islands. It was completed and commissioned in June 2017 and is located on a 20-acre site in Bodden Town, Grand Cayman. The Farm comprises 21,690 poly-crystalline photovoltaic (solar) modules each with a DC-rated capacity of 305 watts.

How can the Cayman Islands build climate resilience?

With a target of 70 percent renewable energy by 2037, the Cayman Islands is seeking to build climate resilience by purchasing clean energy for its electricity supply. The country established its first utility-scale solar project in 2017 through a power purchase agreement with renewable energy generated from the Bodden Town Solar Farm.

What are the benefits of solar power in the Cayman Islands?

Supplies sufficient power to Caribbean Utilities Company, Ltd. to serve 1,800 homes in the Cayman Islands. Reduces greenhouse gas emissions by 7,900 tons of CO₂ per year. Serves as the country's only utility-scale solar project, providing renewable energy to the grid's peak load of 110 MW.

Is Cayman the perfect place to harness solar energy?

Significant improvements are being made in the solar energy industry every year and Cayman is the perfect location to harness the power of the sun. Solar energy can be harvested in two ways: solar photovoltaic (PV), which converts sunlight into electricity and solar thermal, which heats water.

Are solar panels duty-free in Cayman?

However, renewable energy equipment, such as solar panels, are in fact duty-free for residential homeowners. Although Cayman enjoys over 300 days of sunshine, you will need to consider an alternative source of power should there be no sun. One such option is the Tesla Powerwall battery.

Why did Bodden Town solar move to the Cayman Islands?

The original developers of the Bodden Town Solar facility sought to exit the Caribbean market once the plant entered service. BMR seized the opportunity to establish operations in the Cayman Islands, expanding the footprint of its business and positioning itself for further growth in this important market.

Switching over to solar can significantly reduce your carbon footprint and help combat climate change, not only for yourself but for the entire Cayman Islands too. Our beloved islands' footprint is unfortunately still over 97% fossil, so act and accelerate our way to eco-friendliness.

GreenTech Solar are the market leaders in Cayman in both experience and expertise, we have installed the largest and most complex renewable energy systems in the country. By using industry best technology

Solar power irrigation project Cayman Islands
