

A new Foro Sella Renewable Energy Observatory report shows that 46 renewable energy projects with a total capacity of 3,526.5 MW in Spain secured administrative authorizations in the second ...

Spain's Ministry for the Ecological Transition and Demographic Challenge (MITECO) has published a revised draft of the National Integrated Energy and Climate Plan (PNIEC) with a target of...

The Spanish government has set a new 2030 solar target of 76 GW in an energy strategy submitted to the European Commission. It aims to cover over 80% of national electricity demand with renewable...

The Ministry of Ecological Transition (MITECO) in Spain has updated its National Energy and Climate Plan (NECP) with an increased target for solar PV of 76GW by 2030.

By 2030, Spain is expected to install 76GW of PV, including 19GW for captive use. According to Spanish grid operator Red Elsamtrica, the country had 22,454MW of PV capacity installed and connected to the grid as of early September.

OverviewTimeline of developmentsSolar thermal power plantsPhotovoltaicsPolicies, laws and incentivesResearch and developmentSee alsoExternal linksSpain is one of the first countries to deploy large-scale solar photovoltaics, and is the world leader in concentrated solar power (CSP) production. In 2022, the cumulative total solar power installed was 19.5 GW, of which 17.2 GW were solar PV installations and 2.3 GW were concentrated solar power. In 2016, nearly 8 TWh of electrical power was produced from photovoltaics, and ...

The Spanish Ministry of Ecological Transition (MITECO) has authorised the construction of nearly 25GW of solar PV capacity to be built in Spain. The combined capacity for solar PV totals...

The Spanish Ministry of Ecological Transformation (MITECO) has approved the construction of nearly 25GW of solar PV capacity in Spain. The total installed solar PV capacity is 24,870 MW, distributed in 239 projects.MITECO has provided administrative construction authorizations (AAC in Spanish) for a total of 283 renewable energy generation ...

The amount of solar photovoltaic energy generated in Spain up to 5 October 2024 was more than all the energy registered in 2023, according to data provided by Red Eléctrica. Last Saturday, this renewable technology reached 37,551 GWh, a figure that is higher than the 37,472 GWh recorded last year and which was itself a historical record.

Spain's solar potential. Spain is one of the first countries to deploy large-scale solar photovoltaics, and is the

world leader in concentrated solar power (CSP) production. In 2022, the cumulative total solar power installed was 19.5 GW, of which 17.2 GW were solar PV installations and 2.3 GW were concentrated solar power.

Spain's Solar Rooftop Country Profile. April 2024. Red = 0-1 points. Orange = 2-3 points. Green = 4-5 points. This country profile highlights the good and the bad policies, and practices of solar rooftop PV development within Spain. It examines and scores six key areas: governance, incentives & support schemes, permitting procedures, energy ...
