How much electricity does Palestine use?

Electricity supply and demand According to the Palestinian Central Bureau of Statistics (PCBS),the total electrical energy consumption in Palestine in 2019 was reported to be 5,929.5 GWh. This quantity is almost entirely imported from outside sources,mainly from the Israel Electric Corporation (IEC),as shown in Table 1.

What is the energy problem in Palestine?

The energy problem in Palestine is one of many issues that affect the social and economic conditions of the Palestinian people. The fact that most of the energy is imported at relatively high pricesplaces more financial burdens on poor and marginalized people.

Does Palestine have a potential for solar power?

The Palestinian territory has a high potentialfor solar power generation,as it receives around 3,000 hours of sunshine per year. As a result,the Palestinian Authority is looking to attract investments in the renewable energy sector. Inauguration of the solar power plant in a school in Beit Hanina,Jerusalem.

Does Israel control electricity in the West Bank & Gaza Strip?

Furthermore,the fact that the electricity used in the West Bank and Gaza Strip is entirely controlled by Israel,either directly or indirectly,increases the complexity of the situation and the energy insecurity of Palestinian communities at large. In Gaza,the only power generation currently used is fossil fuel.

Where is electricity supplied in Palestine?

Table 1: Sources of Electricity in Palestine Based on Yearly Consumption (PCBS 2019). The West Bank is mainly supplied by three 161/33 kV substations: one in the south close to Hebron; another one in the central West Bank,near the town of Salfet,close to Nablus; and a third in the northern part of Jerusalem.

How much do Palestinians spend on energy?

On average,households spend nearly 34 percent of their income on food and around 8.5 percenton energy (electricity and liquid gas). This reflects the vulnerability of Palestinians,especially the poor and marginal segments,and limits their ability to obtain the energy they need for daily use.

Renewable energy in Palestine is a small but significant component of the national energy mix, accounting for 1.4% of energy produced in 2012. [1] Palestine has some of the highest rate of solar water heating in the region, [2] and there are a number of solar power projects.
