

Explore our best-in-class technology for automated storage & retrieval systems providing warehouse efficiency and flexibility, and ASRS for miniloads, cartons, and pallets.

The future of storage technology is increasingly defined by the integration of AI and hybrid cloud solutions. These technologies enable seamless connectivity to cloud platforms and provide the flexibility to move data between on-premises and cloud environments, which is critical for future-proofing IT infrastructures.

Discover the latest technologies, innovations and trends in logistics From automated storage and conveyor technology to infrastructure through to pickin. Logistics & Automation Schweiz 2025 is held in Zurich, Switzerland, from 1/22/2025 to 1/22/2025 in Messe Zurich.

Automated Storage and Retrieval Systems (AS/RS) are at the forefront of this transformation, offering solutions that address the unique challenges of cold storage environments, such as maintaining consistent temperatures and managing the complexities of pallet handling.

An expert in pallet storage systems, Swisslog - which is based in Switzerland - is implementing an automated high-rack storage system for SFR as part of this project. The storage system will include a picking area and an SAP EWM (Extended Warehouse Management) environment.

Dematic offers a wide range of storage solutions designed to minimise and mobilise your stock. We can help you organise and control inventory on pallets, cartons (totes) and garments-on-hangers. No matter the scale of your facility, the type of inventory, or how it's packaged, our storage solutions offer your business important advantages.

High-performance storage solutions for your pallets and containers. We design future-proof and scalable automated multichannel storage system solutions that are precisely tailored to your specific industry, product and company requirements and can grow with your needs.

Libattion is a Zurich-based company bringing cutting-edge battery storage technologies into industrial and commercial use. The company was founded in 2018 with the vision to develop a greener and more sustainable battery storage solution.

The company is an ISO 9001:2015 certified storage solution manufacturing company. It manufactures and installs metal storage racks, automated warehouses, and other storage solutions.

Switzerland is internationally recognised for its innovative and efficient mechanical engineering companies in

the field of conveyor and intralogistics technology. These companies help to automate storage and transport processes and increase industrial efficiency.
