

Sun Water Fire's innovative technology offers a unique opportunity for Mayotte to achieve energy independence, enhance water management, and tackle climate adaptation in a transformative...

Mayotte is no doubt the French overseas territory facing the most challenging energy transition. It has the highest cost of electric power generation, at nearly EUR350/MWh in 2021, and the most carbon-intensive production, with fossil fuels accounting for over 95%. And consumption is rising sharply each year.

10 · WASHINGTON -- A NASA spacecraft is performing better than expected as it makes its closest approach to the sun this week. Parker Solar Probe will pass 6.1 million kilometers from the sun at 6:53 ...

Électricité de Mayotte poursuit son virage « vert » avec son plan solaire. Depuis plusieurs mois, le service transition énergétique et innovations s'emploie pour déployer des centrales photovoltaïques sur le territoire.

Electricité de Mayotte, société d'économie mixte chargée de la production, de la distribution et de la commercialisation de l'électricité sur le territoire de Mayotte, a démarré la construction d'une centrale photovoltaïque en autoconsommation.

The Hamaha plant is a photovoltaic farm with storage located on the Indian Ocean island of Mayotte inaugurated in November 2023. The plant has been installed on the site of a former landfill to the northeast of the island that stopped receiving household waste in 2014 in order to begin its rehabilitation phase.

Akuo inaugurated the Hamaha solar plant with storage on Mayotte Island. Built on a former landfill, the project, developed in collaboration with local authorities, repurposes the land for a 30-year decontamination period.

Sun to earth solar Mayotte

12 · The Parker Solar Probe was launched in 2018 to get a close-up look at the sun. Since then, it has flown straight through the sun's corona: the outer atmosphere visible during a total solar eclipse.

2 · Plans call for Parker on Tuesday to hurtle through the sizzling solar atmosphere and pass within a record-breaking 3.8 million miles (6 million kilometers) of the sun's surface. At that moment, if the sun and Earth were at opposite ends of a football field, Parker "would be on the 4-yard line," said NASA's Joe Westlake.

6 · Plans call for Parker on Tuesday to hurtle through the sizzling solar atmosphere and pass within a record-breaking 3.8 million miles (6 million kilometers) of the sun's surface.
