Why are electricity prices different in northern and southern Sweden?

In northern Sweden more electricity is produced than is needed,in southern Sweden it is the opposite. Therefore a large amount of electricity is transported from north to south Sweden. Bidding areas can have different prices for electricity due to the physical limitations of the transmission grid.

How is electricity price determined in Sweden?

Conversely,when demand is high or supply low,the price will become higher. The electricity price is determined per bidding area(Sweden is subdivided into 4 areas) and is therefore determined by the supply and demand in the respective bidding area.

Cost depends on the size of your home and whether or not you want your generator to power your whole house or just the "essentials". Once it's determined how much power is needed, the project will include the cost of the generator, site preparation work, concrete pad installation, permits, and connection to an existing natural gas line.

You will also want to consider the size and price of the generator you are about to purchase. Prices generally start at around \$12,000 and can go as high as \$16,000.

How much does it cost? The average cost of a fully installed generator system is \$12,000 - \$20,000. This includes the generator, full installation, permitting, and a personalized project manager.

Our generator installation service plan is included with your generator purchase at no additional cost for the first one year. We include one year of remote monitoring, maintenance and service. Compare our protection plan to any other installer and see the difference Canter Power makes.
