

Why should you choose refustor energy storage systems?

"REFUstor's energy storage systems will complement and enhance our current hybrid energy storage product offerings and will further accelerate our development of new technologies as we continue to provide our commercial and industrial consumers with leading solutions for their adoption of renewable energy.

What happened to glass before the Syrian crisis?

Before the Syrian crisis, glass was exported via Syria to Lebanon for recycling into local furnaces. This practice ended with the start of the Syrian civil war and consequent closure of the border with Syria.

What happened to refustor?

REFUstor's highly efficient and extendable storage systems paired with their energy management solution provide businesses the opportunity to build their own energy ecosystem, while simultaneously reducing their electricity costs. The transaction closed on February 1st, 2023. Terms of the deal were not disclosed. ###  
About Pramac

How did the conflict in Syria affect recycling activities in Jordan?

The conflict in Syria and the closure of the border impacted the existing valorisation activities in Jordan by cutting off one of the trade routes for export of recycled materials and products. The MSW composition includes the following recyclable materials: 3.2.1. Organic waste

Where is refu made?

At its location in Pfullingen at the foot of the Swabian Alb, the company develops, sells and services innovative components for the solar and battery storage market at the highest technical level. Production takes place in Pfullingen and at the REFU factory in Hungary.

Where are refu inverters made?

Production takes place in Pfullingen and at the REFU factory in Hungary. Here, the company can draw on the extensive experience of the team, which has sold over 400,000 inverters to date. REFU Elektronik GmbH is part of the internationally operating PRETTTL group of companies.

Syrian refugee crisis is a problem of global proportions. Despite the gravity of the refugee crisis, states can manage it if they cooperate to share the cost and responsibility of pro-

A second decrease in reservoir storage was detected in both regions after 2012, but the decrease is significantly more dramatic in Syria, from which refugees fled.

We carried-out up-to date waste composition analysis data on Syrian Refugee camp. o This is likely the first worldwide published MSW analysis results on refugee camp. o ...

We carried-out up-to date waste composition analysis data on Syrian Refugee camp. o This is likely the first worldwide published MSW analysis results on refugee camp. o The seasonal variation has no effect on the refugee camp"s MSW composition. o The results represent a baseline for Syrian refugees camps in Middle East & Europe. o

Most importantly, the presence of Syrian refu-gees is construed as an existential threat, jeop-ardising previously delicate balances in host countries. In Turkey, support for refugees depends primarily on whether one is for or against the AKP government, whose Sunni-oriented foreign policy to-ward Syria is not only highly unpopular, but also com-
