

The Gambia solar energy storage devices

The Government of the Gambia through the Ministry of Petroleum and Energy (MoPE) and the National Water and Electricity Company (NAWEC) has benefitted from World Bank's support to develop a 50 MWp Regional Solar Project on a site with excellent solar irradiation in Soma - Lower River Region, The Gambia.

The Gambia entered a new era of energy development in April 2023 with the inauguration of its first large-scale solar energy facility in Jambur. Built by Chinese manufacturer Tebian Electric Apparatus, the 23 MW solar plant - equipped with an 8 MW electricity storage system - serves to reduce the country's reliance on imported fossil fuels.

Gambia's Ministry of Petroleum and Energy (MoPE) and state-owned utility Nawec have jointly launched a tender for the construction of a 50 MW PV plant in Soma, south of the River Gambia.

The Gambia Sustainable Energy Sector Program - With a budget of Euro 136 million from the European Investment Bank, World Bank and others, this project began in 2018 and seeks to restore and modernize the energy transmission grid, install on-grid solar Photovoltaic (PV) units and off-grid PV units for health facilities and public schools in ...

Why Energy Storage in The Gambia? oThe Government is decided to promote local solar to complement the imports from WAPP and minimize use of HFO oSolar was a good alternative because the resource is abundant and international prices had ...

The Gambia is highly competitive in its renewable energy potential compared to regional competitors. Unique Energy provides alternative power backup systems, electrical installations and renewable energy solutions with a focus on generating the cleanest and most cost-effective energy solutions for wholesale energy markets.

This project, with a capacity of 50MWp and 18MWh battery storage, aims to be Gambia's first utility-scale independent power producer (IPP). Upon completion, it is also expected to serve as the cornerstone for a future West African Power Pool ...

This project component consists in the construction of a new 23 MWp solar park tied with 8MWh battery storage and aims to revolutionize power generation in the Gambia by serving as a direct complement to current generation ...

Gambian utility Nawec is seeking proposals for a 50 MW PV plant planned to be deployed in Soma, south of the Gambia River. The project is part of a broader solar project that will eventually include unspecified battery storage capacity.
