

The Gambia solar geysers

Why should the Gambia invest in solar energy?

To match the rising demand and to provide sustainable and accessible energy to all Gambians, the potential for solar energy investment is immense in The Gambia. The government of The Gambia seeks to increase RE's contribution to 40% from 2% presently in the coming years.

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

Why is energy important in the Gambia?

Energy Security: Increases energy independence and strengthens the stability and reliability of The Gambia's power grid. Economic Growth: Creates jobs, stimulates economic activity, and attracts further investment in renewable energy.

Is Gambia ready for a new era of renewables?

Gambia: strong international support for a new era of renewables with inauguration of historic 23 MWp solar plant. A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.

Why is NAWEC launching a solar plant in the Gambia?

This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned. This solar plant allows NAWEC to finally shift away from expensive heavy fuel oil-based generation which is costly and harmful to the environment.

Why is the World Bank partnering with the Gambia?

"The World Bank is pleased to join The Government of The Gambia to witness this remarkable milestone in the Energy Sector. This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned.

Clean Energy: Produces 23MW of clean solar power, reducing greenhouse gas emissions and contributing to environmental protection. Energy Security : Increases energy independence and strengthens the stability and reliability of The Gambia's power grid.

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation

capacity of 98 MW and enable electrification of rural areas.

Clean Energy: Produces 23MW of clean solar power, reducing greenhouse gas emissions and contributing to environmental protection. Energy Security : Increases energy independence and strengthens the stability and ...

The Gambia through the National Development Plan seeks to increase its share of Renewable Energy from 2% to 40% and encourage private sector participation to provide 24/7 access to electricity to all Gambians. For this reason, The Gambia has introduced the following measures to attract foreign investments: Through the Renewable

The Gambia benefits from around 3,000 hours of annual sunshine, translating to a minimum daily solar production capacity of 4 kWh per m². In terms of wind power, the country enjoys favorable conditions, with wind speeds ranging from 3.4 to 4.2 meters per second at a height of 30 meters.

Solar Energy in The Gambia April 28, 2022. Category: Resources Download Resource. Solar Energy in The Gambia. Looking for more information? Contact GIEPA today for help with your project. Contact Us. The Gambia Investment & Export Promotion Agency (GIEPA) is the national agency established by an Act of Parliament in July 2010 responsible for ...

Gambian utility Nawec and the country's Ministry of Petroleum and Energy is seeking proposals for a first phase 50 MW solar project with energy storage located in Soma. The preliminary design and planning model concluded that the capacity of the solar power park could be up to 150 MW with storage at Soma substation and could be built in two ...

Increasing investment into clean and reliable renewable energy for The Gambia is a top priority of the government. Due to its strategic location and ideal conditions, The Gambia is ideally suited for investment into the Solar Energy sector. The Gambia has already made significant progress in the Solar Energy sector

The Gambian government has just inaugurated its first large-scale solar energy production facility. Located in Jambur, the plant, financed by the European Union (EU) and the World Bank, has a capacity of 23 MWp.

Increasing investment into clean and reliable renewable energy for The Gambia is a top priority of the government. Due to its strategic location and ideal conditions, The Gambia is ideally suited for investment into the Solar Energy sector. The ...

The Government of the Gambia through the Ministry of Petroleum and Energy (MoPE) and the National Water and Electricity Company (NAWEC) has benefitted from World Bank's support to develop a 50 MWp Regional Solar Project on a site with excellent solar irradiation in Soma - Lower River Region, The Gambia.

The Gambia benefits from around 3,000 hours of annual sunshine, translating to a minimum daily solar production capacity of 4 kWh per m². In terms of wind power, the country enjoys favorable conditions, with
