

The new device with the longest power storage is outdoors

How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO₄ battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePO₄ power stations will last for more than 3,000 charge cycles, or about 10 years.

Why is portable energy storage so important?

In the U.S., there is high demand for portable energy storage due to outdoor self-driving camping needs. Japan, with its frequent earthquakes, has more regular household storage needs. Meanwhile, Europe is caught in an energy crisis, increasing the demand for home solutions for continuous power outages.
