to more than 25,000 plus customers in the Kingdom of Tonga, including the outer islands of "Eua, Ha"apai & Vava"u.

The most cost-effective choice for the future is to avoid diesel-fired power and switch to renewables. Greater investment in solar and wind energy will help Tonga's transition to renewable energy-based electricity production. Energy improvement surpassing SDG 7 is possible for Tonga and can prevent fuel import reliance.

As the world transitions from fossil fuels to cleaner and safer energy sources, Tonga is at the forefront of the movement in the Pacific. PCREEE and TNQAB are collaborating on a groundbreaking initiative with the Pacific Community's (SPC) Educational Quality and Assessment Programme (EQAP) to develop a regional qualification on E-mobility.

Sustainable Source of Power. Our transition from diesel generation to renewable energy is our progress towards achieving a sustainable power source for the Kingdom for generations to come. Our current electricity generation method heavily relies on imported fossil fuels from overseas to generate electricity for Tonga.

This collaboration seeks to address key challenges within the existing energy management system (EMS) and micro-grid systems (MGS), ensuring the efficient integration of renewable energy sources such as wind and solar power into Tonga's power grid.
