

Tunisia international energy solutions

What is Tunisia's energy transition strategy?

With abundant renewables sources, renewable energy technologies constitute the main pillar of Tunisia's energy transition strategy given the socio-economic benefits that this strategy will provide to the Tunisian economy in terms of increased investments, a clean economic growth, job creation and preserving the environment.

Who regulates electricity in Tunisia?

MEMTE is responsible for electricity infrastructure, planning and the implementation of national policy in the field of electricity, energy efficiency and renewable energy, with regulatory oversight also carried out by the ministry. Yet, Tunisia has no independent regulator.

Who manages the energy sector in Tunisia?

As of March 2020, the Tunisian electricity sector is managed by the Ministry of Energy, Mines and the Energy Transition. For the past two years, renewable energy portfolio was managed by the Ministry of Industry, Small and Medium Size Enterprises.

How does the FTE work in Tunisia?

a transparent and competitive environment for renewable energy developers. settle conflicts among market actors relating to the interpretation or implementation of established legislation and procedures. The FTE is the main financing tool for renewable energy and energy efficiency activities in Tunisia.

Will Tunisia create an independent regulatory authority for the electricity sector?

The procedures to create and establish an independent regulatory authority for the electricity sector are being finalised as part of Tunisia's NDCs to ensure the achievement of its renewable energy targets. The authority will ensure compliance with regulations and will promote a transparent and fair competitive environment for private producers.¹

What is a renewables readiness assessment in Tunisia?

Renewables Readiness Assessment: Tunisia, prepared in collaboration with the National Agency for Energy Conservation (ANME) and the Ministry of Industry, Energy and Mines, identifies key challenges as the country pursues environmentally and economically sustainable power and heat.

Power Tunisia remains dedicated to fostering innovation, driving investments, and facilitating knowledge transfer to ensure the successful realization of Tunisia's Energy Strategy for ...

USAID Power Tunisia. Advancing Tunisia's energy security and resilience by providing technical assistance and facilitating investment funding for the deployment of clean energy technologies ...

Tunisia's energy transition strategy is based on four main pillars: energy security; increasing energy

independence; reducing costs; and diversifying energy resources. With abundant ...

Power Tunisia remains dedicated to fostering innovation, driving investments, and facilitating knowledge transfer to ensure the successful realization of Tunisia's Energy Strategy for 2030/2035. Together, we can achieve a greener, more sustainable future for Tunisia.

USAID Power Tunisia. Advancing Tunisia's energy security and resilience by providing technical assistance and facilitating investment funding for the deployment of clean energy technologies resulting in increased clean energy generation capacity, reduced energy demand and consumption, and lower CO2 emissions.

Tunisia's energy transition strategy is based on four main pillars: energy security; increasing energy independence; reducing costs; and diversifying energy resources. With abundant renewables sources, renewable energy technologies constitute the main pillar of Tunisia's energy transition strategy given the socio-economic benefits

To support the Tunisian energy sector in achieving its clean energy goals, Power Tunisia program will support the delivery of renewable energy and energy efficiency projects through targeted technical assistance, grant funding, and capacity building for sector stakeholders via a competitive application process through our website application ...

The Government of Tunisia (GoT) has embarked on an ambitious path to increase its renewable energy production. The GoT plans to reach 35% of renewable energy in the electricity system capacity by 2030, ...

In response to the energy security challenges of the early 2000s, and Tunisia's vulnerability to volatile international energy prices, the country has decided to embark on an energy transition process as part of its wider sustainable economic and social development strategy. Amid the coronavirus outbreak in early 2020,

It identifies various existing barriers to the development of renewable energy in the country and proposes a number of corresponding solutions to assist Tunisia's energy transition. These include: The need for a renewable energy planning and scheduling framework to govern the long-term development of the necessary infrastructure to support ...

their renewable energy potential, such as Tunisia. The objective of this report is to look into the potential of Battery Energy Storage System (BESS) development in Tunisia, in line with ...

their renewable energy potential, such as Tunisia. The objective of this report is to look into the potential of Battery Energy Storage System (BESS) development in Tunisia, in line with national efforts towards a clean and sustainable energy transition as well as ensuring the optimal use of energy sources and improving energy security.

Through its work, the Power Tunisia program seeks to contribute to the following high-level objectives

Tunisia international energy solutions

planned for Tunisia's energy sector: Increase Renewable Energy Deployment; Reduce CO2 Emissions; Reduce Electricity Consumption; Mobilize External Capital in Clean Energy Investments; Engage and Support Tunisian Firms

In response to the energy security challenges of the early 2000s, and Tunisia's vulnerability to volatile international energy prices, the country has decided to embark on an energy transition ...

To achieve Tunisia's renewable energy goals, the International Renewable Energy Agency recommends eight key actions: Establish a renewable energy planning and scheduling framework; Enhance renewables resources assessment through zoning; Simplify procurement procedures for power grid development

The Government of Tunisia (GoT) has embarked on an ambitious path to increase its renewable energy production. The GoT plans to reach 35% of renewable energy in the electricity system capacity by 2030, against 3% currently. Renewable energy is then expected to cover 50% of the electricity needs by 2035, and 100% of all electricity needs by 2050.

Through its work, the Power Tunisia program seeks to contribute to the following high-level objectives planned for Tunisia's energy sector: Increase Renewable Energy Deployment; Reduce CO2 Emissions; Reduce Electricity ...
