

Vietnam: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The Vietnam Energy Outlook Report - Pathways to Net Zero (EOR-NZ) released on June 19 said that to achieve the 2050 target, Vietnam's CO2 emissions should peak in 2030 and the green energy ...

Vietnam Energy Outlook Report 2024 launched. Vietnam's target of achieving the climate neutrality by 2050 is not only technically feasible but also the most cost-effective scenario, according to a report developed by ...

Vietnam Energy Outlook Report 2024 launched. Vietnam's target of achieving the climate neutrality by 2050 is not only technically feasible but also the most cost-effective scenario, according to a report developed by Vietnam's Electricity and Renewable Energy Authority, the Danish Energy Agency (DEA) and the Embassy of Denmark in Vietnam.

The Vietnam Energy Outlook Report - Pathways to Net Zero (EOR-NZ) is released on June 19. (Photo: The Embassy of Denmark in Vietnam) The Vietnam Energy Outlook Report - Pathways to Net Zero (EOR-NZ) released on June 19 said that to achieve the 2050 target, Vietnam's CO2 emissions should peak in 2030 and the green energy transition needs ...

The report shows how Vietnam through the expansion of renewable energy, along with electrification of the industry and transport sectors, can secure a cost-efficient green transition and reach its target of net-zero emissions by 2050, while reducing Vietnam's dependence on energy imports.

As a result, coal is the leading source of power, accounting for over 40 percent of the power supply, while hydropower and other renewables were responsible for over a third of the energy mix.

5 · The Ministry of Industry and Trade (MOIT) has just sent a document to the People's Committees of Provinces, cities and Electricity of Vietnam (EVN) to implement Government Decree 80/2024/ND-CP, dated July 3, 2024, on the DPPA mechanism between the renewable energy generators and large electricity users in the whole country.

The report shows how Vietnam through the expansion of renewable energy, along with electrification of the industry and transport sectors, can secure a cost-efficient green transition and reach its target of net-zero ...

Vietnam energy supply eood

The report presented development scenarios of Vietnam's energy system to 2050, focusing on analyzing realistic pathways for Vietnam to achieve its net zero emissions commitment by 0. One of the report's key findings shows that achieving Vietnam's carbon neutrality target by 2050 is not only technically feasible but also the most cost-effective ...
