In order to reduce the dependency on imported fuels for electricity, Wallis and Futuna are investing in renewable energy solutions. Solar energy has been identified as a particularly viable option, and efforts are being made to install solar panels and encourage the use of solar water heaters in homes and businesses.

Manuia is a telecommunications network operating in Wallis and Futuna. The business which operates as part of the Service des Postes et T&#233;l&#233;communications (SPT) provides essential communication services to the residents of this French island collectivity in the South Pacific.

The Critical Materials Monitor aims to improve understanding of supply chains essential for the energy transition, the transition to more sustainable energy. It offers insights into the critical minerals required, outlines the components of key technologies, and provides in-depth reserve, production, and trade analysis.

Wallis and Futuna, like the rest of our Pacific neighbours, are on the frontline of the climate crisis. Through a collaborative project with MetService - Te Ratonga Tirorangi and the Embassy of France in New Zealand - Ambassade de France en Nouvelle-Z&#233;lande, aux &#206;les Cook et aux Samoa, we've produced a series of five newsletters detailing the critical climate risks facing ...
