

# Wallis and Futuna sonnenbatterie evo price

How much does a Sonnen Evo cost?

But as Sonnen has always positioned itself as a premium brand, it's not likely to be cheap. Update December 7th 2021: Sonnen has told me they expect the sonnen Evo to cost around \$14,000 including installation, which is a much better price than I expected. The sonnen Evo has the following features: 10 kilowatt-hours of usable storage.

Does the sonnenBatterie Evo have a solar inverter?

The sonnenBatterie Evo is AC coupled. This means it operates independently from the solar system, so it doesn't matter what type of inverter your solar power system has. It can also be installed in homes without rooftop solar panels. This is the sonnen Evo's power unit, which includes the battery inverter.

Where is the Sonnen Evo battery made?

The sonnen Evo is imported from Germany. Sonnen won't assemble it in Adelaide despite all the support they received from the South Australian government to set up a factory here. At the battery launch, sonnen said they would keep that capacity for "future use".

Can a Sonnen Evo battery be charged during a blackout?

But it will only be able to charge the battery in a blackout using solar power if the solar inverter is 6 kilowatts or less on the same phase as the sonnen Evo. The battery has a black start capability that you can use during a blackout (if you have 6 kilowatts or less of solar inverter capacity on the backup phase).

Can a Sonnen Evo be used with a virtual power plant?

This is much better than most lithium solar battery warranties. Update December 7th 2021: Sonnen has told me the sonnen Evo can be used with Virtual Power Plants (VPPs) other than those offered by sonnen and not just their own, as I originally had written. Sonnen says the Evo battery should be available in early 2022.

Does a Sonnen Evo have backup power?

Backup power is an expensive optional extra. Even with the backup option, it can't charge from rooftop solar panels when the grid is down. It's expensive. But now, less than a week later, sonnen has launched their new battery -- the sonnen Evo. It mostly addresses these concerns -- except for the last one.
