As the first battery storage project in West Africa dedicated to frequency regulation, Walo Storage is designed to stabilize the local grid and reduce blackouts. In addition, 16 MW of clean electricity will be generated ...

Situé à Bokhol, au Sénégal, Walo Storage est le premier projet de stockage par batteries en Afrique de l'Ouest et la régulation de la fréquence afin de garantir la stabilité du ...

The EUR42 million Walo storage project facility located in Bokhol, Senegal will consist of a 10MW/20MWh BESS supplied by a 16MWp solar PV plant. The lithium-ion battery ...

Africa REN, a renewables project developer in West Africa, announced the successful financing of its Walo Storage project in Senegal. The Dutch development bank FMO and the Emerging Africa Infrastructure Fund (EAIF), acting through its fund manager Ninety One, will invest up to a total of EUR32 million in syndicated debt into Walo Storage.

As the first battery storage project in West Africa dedicated to frequency regulation, Walo Storage is designed to stabilize the local grid and reduce blackouts. In addition, 16 MW of clean electricity will be generated through the adjacent PV plant. 217 local jobs will be created during the construction phase and 30 during the operating phase.

Located in Bokhol, Senegal, Walo Storage is the first battery storage project in West Africa dedicated to frequency regulation to ensure grid stability. This project marks a ...

First major storage project in Africa Urgent need to stabilize the grid, due to the high share of renewable production in the energy mix. The project will increase the current spinning reserve by 40% and will provide additional services such as frequency control, island functioning and Black-Start capability.

The EUR42 million Walo storage project facility located in Bokhol, Senegal will consist of a 10MW/20MWh BESS supplied by a 16MWp solar PV plant. The lithium-ion battery project will be incorporated into the solar PV plant, which will use a single axis tracker system.

This financing will enable the development, construction and operation of a 10 MW / 20 MWh battery storage facility and 16 MW solar power plant with a total project cost of ...

Located in Bokhol, Senegal, Walo Storage is the first battery storage project in West Africa dedicated to frequency regulation to ensure grid stability. This project marks a significant milestone for the region's energy sector.

This financing will enable the development, construction and operation of a 10 MW / 20 MWh battery storage facility and 16 MW solar power plant with a total project cost of around EUR 40 million. It will be located in Bokhol, Northern Senegal, near the Senegy 2 solar plant that is also owned by Africa REN and financed by FMO.
