

The NGO Western Sahara Resource Watch reported that up to 80 percent of the land earmarked by Morocco for green hydrogen production lies in the Western Sahara. For the time being, the official EU position bars the EU ...

Morocco aims to double green electricity production in Western Sahara by 2027, setting a target of 1.4 gigawatts of new wind and solar capacity to meet rising demand ...

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring campaign ...

For two weeks Morocco has been openly bragging about its renewable energy projects, which are to a significant extent situated in Western Sahara, not in Morocco -- and the business is growing, with Western Sahara ...

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring campaign of solar and wind energy potential.

A Moroccan energy ministry official revealed plans this week to build 1.4 gigawatts of new wind and solar power in the disputed region of Western Sahara by 2027, ...

The expansion of renewable energy infrastructure in Morocco's southern provinces is part of a broader strategy to meet the increasing electricity demand across the ...

A Moroccan energy ministry official revealed plans this week to build 1.4 gigawatts of new wind and solar power in the disputed region of Western Sahara by 2027, according to Bloomberg. This initiative will nearly double the ...

The first round of land allocations in Morocco's green hydrogen investment process may soon be completed and is likely to include substantial areas in the contested territory of Western Sahara. African Energy has ...

Western Sahara Resource Watch (WSRW) today publishes a report exposing all existing and planned renewable energy projects in occupied Western Sahara. Download the report (6 Mb).

Morocco aims to double green electricity production in Western Sahara by 2027, setting a target of 1.4 gigawatts of new wind and solar capacity to meet rising demand ahead of the 2030 FIFA World Cup. The

Western Sahara sable energy

project, expected to cost around 21 billion dirhams (\$2.1 billion), will be led by local and international investors, according to a ...

Western Sahara Resource Watch has today launched a report detailing how Morocco intends to build over 1000 MW (megawatts) of renewable energy plants in Western Sahara, a territory that Morocco partially occupies.

Western Sahara Resource Watch works to uncover the plunder of the territory and to keep companies and governments accountable for their support to the occupation.

The first round of land allocations in Morocco's green hydrogen investment process may soon be completed and is likely to include substantial areas in the contested territory of Western Sahara. African Energy has identified projects requiring the installation of at least 72GW of wind and solar generation, and more are likely to follow.

For two weeks Morocco has been openly bragging about its renewable energy projects, which are to a significant extent situated in Western Sahara, not in Morocco -- and the business is growing, with Western Sahara being a sunny, windy area that is ideally suited to produce renewable energy from wind and sun en masse.

The expansion of renewable energy infrastructure in Morocco's southern provinces is part of a broader strategy to meet the increasing electricity demand across the country in preparation for the...

The NGO Western Sahara Resource Watch reported that up to 80 percent of the land earmarked by Morocco for green hydrogen production lies in the Western Sahara. For the time being, the official EU position bars the EU from purchasing energy originating in ...
